Coronavirus (COVID-19)

Everyone gets sick sometimes.
When I get sick I should stay at home until I am better.

Coronavirus (COVID-19) is a new type of virus that can make people sick.
Most people with coronavirus get a cough and fever. They can rest at home until they feel better.

Some people might need to go to hospital so that the doctors and nurses can look after them.
Everyone should try to stay healthy by having good hygiene. I can wash my hands before eating, after playing outside and after going to the toilet.

If I am not near a bathroom I can use hand sanitizer to clean my hands.
I should cover my mouth with a tissue or my elbow when I sneeze or cough.

Having a cough or fever does not always mean you have coronavirus. Someone might just have a cold or flu.
There are a lot of people talking about coronavirus on the TV and internet. It might make me feel scared.

It is okay to feel scared. I can talk to an adult I trust and they will help me.
If lots of people get sick in my community they might need to close the schools until the germs are gone.

It is okay if my school closes. I can spend time at home.
I can try to keep myself and others healthy by practicing good hygiene.
THANK YOU

Your support means so much to me.

If you enjoyed this product please take a moment to leave me some feedback. 4 star ratings make my day because they let me know that you are satisfied with my product. To provide feedback simply go to ‘my purchases’.

If for whatever reason you are unhappy with a product email me at teachingsensoryexplorers@gmail.com and I will get back to you ASAP.
